

Sunil Ghintala

Engineering Manager | AI Platforms | Fintech | Distributed Systems
suniliist@gmail.com | +91 9404746750 | linkedin.com/in/sunil-ghintala/

SUMMARY

Engineering Manager with 12 years of experience building identity, payments, cloud, and AI platforms at scale. Delivered a 1-million-request-per-day identity platform serving approximately 100 customers, 99.99% availability, and 10x traffic at constant infrastructure cost. Built engineering agents adopted by 80% of teams that eliminate 5–10 hours of developer toil each week.

EXPERIENCE

OnePay

Engineering Manager

Bengaluru, India

Aug 2024 – Present

- Led a team of five direct reports and hiring for the India platform organization; built an AI-agent platform adopted weekly by 80% of engineering teams.
- Built Tokki, a background coding agent for low- and medium-complexity chores and toil work, saving developers 5–10 hours per week; implemented sandboxed execution and dynamic DNS allowlisting to secure agent operations.
- Developed an incident-response agent that handles all current incidents by opening revert merge requests and performing initial investigation for the on-call engineer.
- Designed and scaled a centralized memory service that provides persistent context to AI agent deployments through vector embeddings, RAG indexing, and semantic retrieval.
- Improved the CI/CD platform by decoupling CI and CD operations, streamlining monorepo dependency management, adding flaky-test gates, and integrating agent-based code review and validation.

Setu

Engineering Manager

Bengaluru, India

Sep 2020 – Aug 2024

- Managed a team of five engineers building an identity platform for fully digital onboarding journeys, serving five marquee customers, approximately 100 total customers, and 1 million requests per day.
- Personally designed the eSign gateway and automated failover; improved API resilience to 99.99% availability. Database partitioning, S3 optimization, and code profiling enabled 10x traffic at constant infrastructure cost, supporting customer-volume growth, revenue, and new partners.
- Built a bank-statement analysis framework that classifies UPI transactions into categories, improving the credit-scoring process.
- Implemented ECIES end-to-end API encryption and PII masking in logs; established security controls that supported SOC 2 compliance and addressed applicable RBI public-circular recommendations.

Gojek

Product Engineer

Bengaluru, India

Jan 2020 – Sep 2020

- Planned and executed the migration of the eKYC solution from on-premises infrastructure to the cloud, expanded it to new geographies, and reduced operational turnaround time by 60%.

OVO (GrabPay)

Product Engineer

Jakarta, Indonesia

2018 – 2020

- Led the architecture and delivery of an eKYC service handling 2 million requests per day, reducing KYC turnaround time from 2–3 days to under 10 minutes; exposed the service to partners with a 99.99% uptime SLA and p95 API latency below 100 ms.
- Led development of the accounting domain for a lending platform supporting OVO PayLater, Tokopedia PayLater, and Grab driver-lending products; managed a blended permanent, contract, and offshore team.
- Architected the repayment stack for OVO PayLater, handling 100,000 requests per day and processing close to IDR 100 million in repayments; added auto-debit and automated reconciliation with other services.

InfraCloud

Senior Software Engineer

Pune, India

2017 – 2018

- Built automated backup and restore functionality for Portworx, a persistent-storage platform for containers.

GSLab

Software Engineer

Pune, India

2014 – 2017

- Contributed to VM provisioning for a private and hybrid-cloud orchestration platform, reducing provisioning time from 2–5 days to 1–2 hours.

TECHNICAL SKILLS

AI/ML & LLM: AI agents, multi-agent orchestration, RAG, hybrid vector search, re-ranking, RAGAS, MCP, ACP

Languages: Rust, Python, Go, TypeScript

Systems & Data: Kafka, DynamoDB, MySQL, PostgreSQL, CQRS, event sourcing, domain-driven design

Cloud & Reliability: Kubernetes (AKS/EKS), Terraform, Istio/Envoy, OpenTelemetry, PagerDuty, CI/CD, SLOs, error budgets

EDUCATION

University of Pune

B.E., Information Technology

Pune, India

2010 – 2014
